# **Mode for the U 23 competition at 23. + 24. 02. 2008 in Salzburg**

## **Team ranking:**

All teams are playing in one tournament group. A team consists of four players plus substitute.

Every team faces each other team at least one time (depending on the number of participating teams). In reason of no manipulation the first two games of day one the teams of the same nation have to face each other. For the rest of the tournament schedule there will be a drawing before the games start.

Within one game the players with the same position (positions have to be fixed before the tournament) in their teams face each other for an 18-hole-match. These four matches of position one to four start directly behind each other. For each lane, where a player achieves a better score than his opponent, he wins one point. The number of won lanes is counted after the 4 matches in a game. The team with the higher number of won lanes wins 2 points for the group table. Equal score leads to 1 point for each of the teams.

All won points count for the group table. The team with most points after all matches wins. If two teams have equal points, the team with the higher number of won lanes is ranked better. If the number of won lanes is equal too, there will be a team sudden death beginning from lane 1, played in the same mode. The team that wins more pairs at a lane wins the sudden death.

## **Singles Competition:**

Single competition is played by total score after 10 rounds

Dr. Gerhard Zimmermann  
WMF sport director
